- **Tools:** Backend on Ruby and JavaScript/Stimulus; Frontend on HTML, CSS, SCSS, JavaScript; Frontend Framework on Ruby on Rails; Project management framework managed on Slack, Trello, Git, and Github

PROFESSIONAL EXPERIENCE

Waldaschaff Automotive

Department Lead

Esselbach, Germany

Jun 2022 – Dec 2022

- Supervised a team of 15 across functions including production and assembly to maintain high quality outputs by developing and implementing production schedules to meet assembly and build targets.
- Created a streamlined production process to maximize efficiency by collaborating with departments to identify areas to optimize the process and including training and supporting team members in using new equipment and tools.

Machine Operator

May 2020 – Jun 2022

- Operated end-to-end production for automotive parts by setting up and loading materials onto laser machines and robots, conducting regular maintenance checks of machinery, and troubleshooting any issues during operations.
- Managed quality standards across multiple functions and departments by highlighting and coaching on safety protocols, maintaining a clean work area up to code, and accurately reporting on issues during production for triaging to fix by engineers.

Proctor & Gamble

Machine Operator

Marktheidenfeld, Germany

Apr 2019 – Dec 2019

- Led the production line operations for toothbrushes with 35 colleagues by allocating resources on where and when to load raw materials, conducting maintenance checks, and troubleshooting issues.
- Identified areas of opportunities for improvement and increased efficiency by eliminating redundancies, reporting issues to management, and collaborating with team members to find pain points in the production line.

Beurteaux

Assembly Technician

Henderson, Australia

May 2018 – Apr 2019

- Designed, assembled, and tested cruise ship parts by reading and interpreting technical drawings and blueprints to build via hand and power tools, fixtures, and gauges.
- Identified defects and led repair efforts by acting as the quality control point of contact for pieces ready to be delivered, including documentation of any issues to ensure future pattern problems do not persist.

Additional Previous Experience:

- **Assembly Technician, Bosch Rexroth, Lohr am Main, Germany** | May 2017 – Apr 2018
- **Maintenance Technician, AIP Services GmbH, Oslo, Norway** | May 2016 – Dec 2016
